This Prospectus does not, and is not intended to, constitute an offer in any place or jurisdiction, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of securities these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offer is not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia.

Electronic registers mean that the Company will not be issuing certificates to investors. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Electronic sub-registers also mean ownership of Securities can be transferred without having to rely upon paper documentation. Further, monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month. Shareholders may request a holding statement at any other time, however a charge may be made for such additional statements.

(c) **Expiry Date**

Each New Listed Option will expire at 5.00pm (WST) on 31 December 2020 (**Expiry Date**). A New Listed Option not exercised before the Expiry Date will automatically lapse on the Expiry Date.

(d) **Exercise Period**

(e) **Notice of Exercise**

The New Listed Options may be exercised during the Exercise Period by notice in writing to the Company in the manner specified on the New Listed Option certificate (**Notice of Exercise**) and payment of the Exercise Price for each New Listed Option being exercised in Australian currency by electronic funds transfer or other means of payment acceptable to the Company.

(g) **Timing of issue of Shares on exercise**

Within 15 Business Days after the Exercise Date, the Company will:

- (i) allot and issue the number of Shares required under these terms and conditions in respect of the number of New Listed Options specified in the Notice of Exercise and for which cleared funds have been received by the Company;
- (ii) if required, give ASX a notice that complies with section 708A(5)(e) of the Corporations Act, or, if the Company is unable to issue such a notice, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to

ensure that an offer for sale of the Shares does not require disclosure to investors; and

- (iii) if admitted to the official list of ASX at the time, apply for official quotation on ASX of Shares issued pursuant to the exercise of the New Listed Options.

If a notice delivered under (g)(ii) for any reason is not effective to ensure that an offer for sale of the Shares does not require disclosure to investors, the Company must, no later than 20 Business Days after becoming aware of such notice being ineffective, lodge with ASIC a prospectus prepared in accordance with the Corporations Act and do all such things necessary to satisfy section 708A(11) of the Corporations Act to ensure that an offer for sale of the Shares does not require disclosure to investors.

There are no participation rights or entitlements inherent in the New Listed Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the New Listed Options without exercising the New Listed Options.

(l) **Change in exercise price**

A New Listed Option does not confer the right to a change in Exercise Price or a change in the number of underlying securities over which the New Listed Option can be exercised.

(m) **Transferability**

The New Listed Options are transferable subject to any restriction or escrow arrangements imposed by ASX or under applicable Australian securities laws.

## 6.2 Shares

The following is a summary of the more significant rights and liabilities attaching to Shares being the underlying securities of the New Listed Options to be issued pursuant to this Prospectus. This summary is not exhaustive and does not constitute

a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) **General meetings**

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) **Voting rights**

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) **Dividend rights**

Subject to the rights of person (if any) entitled to Shares with special rights to dividend, the Directors may declare a final dividend out of profits in accordance with the Corporations Act and may authorise the payment or crediting by the Company to Shareholders of such a dividend.

The Directors may authorise the payment or crediting by the Company to the Shareholders of such interim dividend as appear to the Directors to be justified by the profits of the Company.

Interest may not be paid by the Company in respect of any dividend, whether final or interim.

Subject to the Corporations Act and ASX Listing Rules, the Directors may in their absolute discretion establish on such terms and conditions as they think fit:

- (i) a 'dividend reinvestment plan' or a 'interest reinvestment plan' for cash dividends paid by the Company in respect of Shares

issued by the Company and interest paid by the Company on unsecured notes or debenture stock issued by the Company to be reinvested by way of subscription for Shares in the Company; and

- (ii) a 'dividend election plan' permitting Shareholders to the extent that the Shares are fully paid up, to have the option to elect to forego their right to share in any dividends (whether interim or otherwise) payable in respect of such Shares and to receive instead an issue of Shares credited as fully paid up to the extent as determined by the Directors.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the sanction of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as the liquidator considers fair on any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the sanction of a special resolution, vest the whole or any part of any such property in trustees on such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any Shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued on exercise of the New Listed Options will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The allotment and issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of Securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class may (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, be varied or abrogated in any way with the consent in writing of the holders of three quarters of the issued shares of that class, or with the sanction of a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

### **7.1 Introduction**

The New Listed Options offered under this Prospectus are considered speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for New Listed pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

### **7.2 Company specific**

#### **(a) Exploration and development risks**

The business of oil and gas exploration, project development and production, by its nature, contains elements of significant risk with no guarantee of success. Ultimate and continuous success of these activities is dependent on many factors such as:

- (i) the discovery and/or acquisition of economically recoverable reserves;
- (ii) access to adequate capital for project development;
- (iii) design and construction of efficient development and production infrastructure within capital expenditure budgets;
- (iv) securing and maintaining title to interests;
- (v) obtaining consents and approvals necessary for the conduct of oil and gas exploration, development and production; and
- (vi) access to competent operational management and prudent financial administration, including the availability and reliability of appropriately skilled and experienced employees, contractors and consultants.

Whether or not income will result from projects undergoing exploration and development programs depends on successful exploration and establishment of production facilities. Factors including costs, actual hydrocarbons and formations, flow consistency and reliability and commodity prices affect successful project development and operations.

Drilling activities carry risk as such activities may be curtailed, delayed or cancelled as a result of weather conditions, mechanical difficulties, shortages or delays in the delivery of drill rigs or other equipment. In addition, drilling and operations include reservoir risk such as the

presence of shale laminations in the otherwise homogeneous sandstone porosity.

Industry operating risks include fire, explosions, unanticipated reservoir problems which may affect field production performance, industrial disputes, unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment, mechanical failure or breakdown, blow outs, pipe failures and environmental hazards such as accidental spills or leakage of liquids, gas leaks, ruptures, discharges of toxic gases or geological uncertainty (such as lack of sufficient sub-surface data from correlative well logs and/or formation core analyses). The occurrence of any of these risks could result in legal proceedings against the Company and substantial losses to the Company due to injury or loss of life, damage to or destruction of property, natural resources or equipment, pollution or other environmental damage, clean up responsibilities, regulatory investigation, and penalties or suspension of operations. Damage occurring to third parties as a result of such risks may give rise to claims against the Company.

There is no assurance that any exploration on current or future interests will result in the discovery of an economic deposit of oil or gas. Even if an apparently viable deposit is identified, there is no guarantee that it can be economically developed.

(b) **Counterparty risks**

In order for the Company to be able to achieve its objectives the Company is reliant on relevant operator of the projects to:

- (i) successfully develop and operate the projects; and
- (ii) do all things necessary to ensure the operator maintains the right to operate the projects.

Failure by the relevant operator to perform the above tasks in relation to a project, or other factors such as insolvency of an operator, could have an adverse impact on the ability of the Company to achieve its objectives.

(c) **Sovereign risks**

The Company's key project interests are situated in the USA. Accordingly, the Company is subject to the risks associated in operating in foreign countries. These risks include economic, social or political instability or change, hyperinflation, currency non-convertibility or instability and changes of law affecting foreign ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, repatriation of income or return of capital, environmental protection, labour relations as well as government control over natural resources or government relations that require the employment of local staff or contractors or require other benefits to be provided to local residents.

The Company and its advisers will undertake all reasonable due diligence in assessing and managing the risks associated with oil and gas exploration and production in the USA. However, any future material adverse changes in government policies or legislation in foreign jurisdictions in which the Company has projects is outside the control of

the Company. Such changes may affect the foreign ownership, exploration, development or activities of companies involved in oil and gas exploration and production and in turn may affect the viability and profitability of the Company.

### **7.3 Industry specific**

#### **(a) Operational risks**

Oil and gas exploration, appraisal, development and production operations are subject to a number of operational risks and hazards including fire, explosions, blow outs, pipe failures, abnormally pressured formations and environmental hazards such as accidental spills or leakage of petroleum liquids, gas leaks, ruptures, or discharge of toxic gases. Oil and gas exploration, appraisal, development and production are generally considered a high-risk undertaking. The operations of the Company may also be affected by a range of factors, including:

- (i) operational and technical difficulties encountered in drilling;
- (ii) difficulties in commissioning and operating plant and equipment;
- (iii) mechanical failure or plant breakdown;
- (iv) unanticipated drilling problems which may affect production costs;
- (v) adverse weather conditions;
- (vi) industrial and environmental accidents;
- (vii) industrial disputes; and
- (viii) unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

#### **(b) Tenure risks**

The oil and gas interests held by the Company are subject to applicable laws regarding exploration, expenditure and renewal of such interests. If an oil and gas lease interest is not renewed (as the case may be) or access cannot be secured to carry out operations, the Company could be adversely affected as a result of the consequential loss of opportunity to discover and develop any oil and gas resources within those oil and gas lease interests.

#### **(c) Environmental risks**

The operations and proposed activities of the Company are subject to laws and regulations concerning the environment applicable in the jurisdiction of those activities. As with most exploration and production, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or production proceeds. The Company will attempt to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws. Nevertheless, there are certain risks inherent in the Company's activities such as accidental leakages or spills, or other

unforeseen circumstances which could subject the Company to extensive liability.

(d) **Permit grant and maintenance risks**

The Company's oil and gas exploration activities are dependent upon the grant, or as the case may be, the maintenance of appropriate licences, concessions, leases, permits and regulatory consents which may be withdrawn or made subject to limitations.

The maintaining of permits, obtaining renewals, or getting permits granted, often depends on the Company being successful in obtaining the required statutory approvals for its proposed activities and that the licences, concessions, leases, permits or consents it holds will be renewed as and when required. There is no assurance that such renewals will be given as a matter of course and there is no assurance that new conditions will not be imposed in connection therewith.

(e) **Title risks**

The ownership of oil and gas lease rights in the USA is a combination of private and governmental ownership (including Indian tribal ownership). The acquisition of privately owned oil and gas lease rights typically involves an initial review of the public records in the counties in which the relevant lands lie in order to determine the ownership of the oil and gas rights. Thereafter, oil and gas leases are negotiated with the owners of those rights. Verifying the chain of title for USA oil and gas leases can be complex any may result in remedial steps to be taken to correct any defect in title.

(f) **Lease expiry**

Successful drilling is fundamental to the appraisal and development of the leases in which the Company holds an interest. The Company's leases may expire if production is not established. It is not uncommon for oil and gas leases in the USA to provide that, if commercial production is not established on the leased properties within a specified period, the leases will expire and the holder of the leasehold interest loses its right to continue to explore for oil and gas on the relevant land.

(g) **Commercialisation**

Should the Company recover what would otherwise be commercial quantities of oil or gas, there is still no guarantee that the Company will be able to successfully transport the oil or gas to commercially viable markets, or sell the oil or gas to customers to achieve a commercial return the Company may not be able to secure satisfactory oil and gas transportation arrangements; there may be no readily available market; and no or limited access to pipelines. Pipeline access arrangements may also be subject to interruption rights which may adversely affect the Company.

## 7.4 General risks

### (a) Economic and government risks

The future viability of the Company is also dependent on a number of other factors affecting performance of all industries and not just the resources industry including, but not limited to, the following:

- (i) general economic conditions in jurisdictions in which the Company operates;
- (ii) changes in government policies, taxation and other laws in jurisdictions in which the Company operates;
- (iii) the strength of the equity markets in Australia and throughout the world, and in particular investor sentiment towards the resources sector;
- (iv) movement in, or outlook on, interest rates and inflation rates in jurisdictions in which the Company operates; and
- (v) natural disasters, social upheaval or war in jurisdictions in which the Company operates.

### (b) Oil and gas price fluctuations

The demand for, and price of, oil and natural gas is highly dependent on a variety of factors, including international supply and demand, the level of consumer product demand, weather conditions, the price and availability of alternative fuels, actions taken by governments and international cartels, and global economic and political developments.

International oil and gas prices have fluctuated widely in recent years and may continue to fluctuate significantly in the future. Fluctuations in oil and gas prices and, in particular, a material decline in the price of oil or gas may have a material adverse effect on the Company's business, financial condition and results of operations.

### (c) Additional requirements for capital

The Company's capital requirements depend on numerous factors. Depending on the Company's ability to generate income from its operations, the Company may require further financing. Any additional equity financing will dilute shareholdings, and debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its exploration programmes as the case may be. There is however no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

### (d) Dividends

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors.

No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(e) **Taxation**

The acquisition and disposal of Shares and Options will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares and/or Options from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for New Listed Options under this Prospectus.

(f) **Reliance on key personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

## **7.5 Speculative investment**

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Listed Options offered under this Prospectus

Therefore, the New Listed Options to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Listed Options.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for New Listed Options pursuant to this Prospectus.

The Company is a “disclosing entity” (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company’s securities.

This Prospectus is a “transaction specific prospectus”. In general terms a “transaction specific prospectus” is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 3 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

  - (iii) any continuous disclosure documents given by the Company to ASX in accordance with the ASX Listing Rules as referred to in section 674(1) of the Corporations Act after the lodgement of the annual financial report referred to in (i) and before the lodgement of this Prospectus with the ASIC.
