

Next Sycamore Well Delivers Another Stunning Result

Perth, Western Australia – November 25, 2019 - Brookside Energy Limited (**ASX: BRK**) (**Brookside** or the **Company**) is pleased to provide details of another initial production result from the Company's SWISH Area of Interest (**SWISH AOI**) in the world-class Anadarko Basin, Oklahoma.

Highlights

- Leon 1-23-14XHM well¹ adds to the building inventory of very strong initial production rates coming from the Sycamore formation in Brookside's SWISH AOI
- This well delivered an initial 24 hour production (**IP24**) of 1,945 barrels of oil equivalent (~79% oil) from a mid-length lateral in the Sycamore formation, the primary target within Brookside's SWISH AOI
- The Leon well is located within Brookside's SWISH AOI approximately 4-miles west of the Company's Flames Drilling Spacing Unit (**DSU**) and 2-miles east of the Ringer Ranch well (Brookside 0.02% Working Interest) which recently recorded an IP24 of 2,067 barrels of oil equivalent
- The Company's first operated well to be drilled in the SWISH AOI (the Jewell 1-13-12SXH well) will also target the Sycamore formation
- This is the third Sycamore well to come on-line in the SWISH AOI since the middle of 2019 as the area continues to attract the attention of the tier-one operators that are enjoying significant success in southern SCOOP

Commenting on the announcement, Brookside Managing Director, David Prentice said:

"We are now three from three in the SWISH AOI, with three Sycamore wells delivering initial production (IP24) results above 1,500 barrels of oil equivalent.

"It is very exciting to see these results continuing to emerge from the drilling and completion activity that is happening in southern SCOOP. These wells are all in close proximity to our Jewell DSU and to the other operated DSU's that we are currently putting together within the SWISH AOI.

"The initial production data we are seeing is better than what we had forecast in our own pre-drill estimates for a Sycamore well in the SWISH AOI and we believe this is likely to support higher recovered volumes, rates of return and ultimately higher per-acre values."

¹ Brookside holds a small 0.12% Working Interest in the Continental Resources, Inc. (NYSE: CLR) operated Leon well and the associated DSU

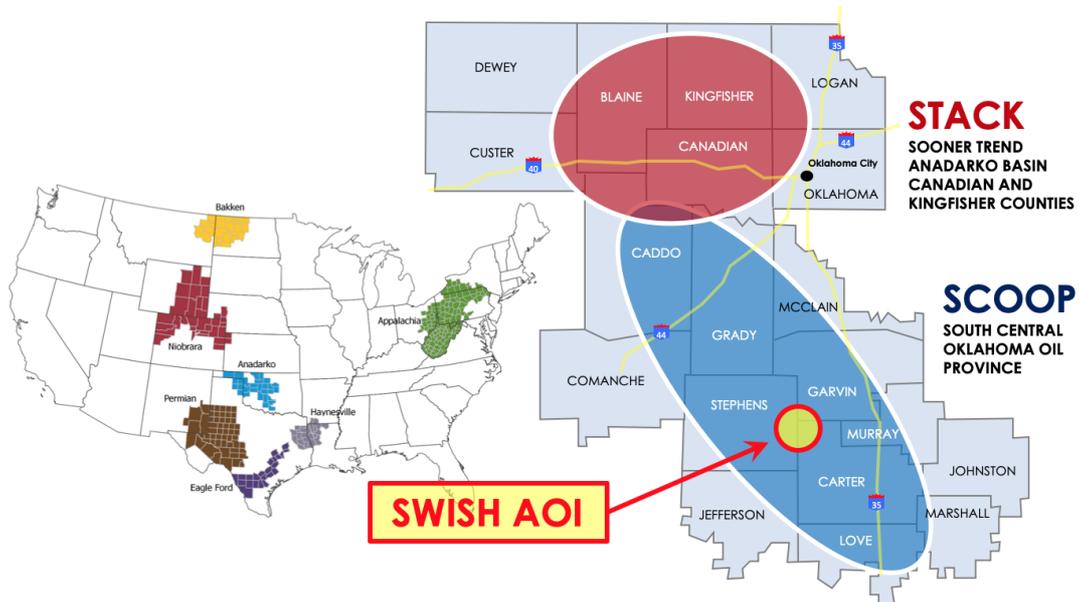

Figure 1. Anadarko Basin, Oklahoma (STACK & SCOOP Plays)

The Continental Resources-operated Leon 1-23-14XHM well, which is located 4-miles west of the Company's Flames DSU and 2-miles east of the Ringer Ranch well (Brookside 0.02% Working Interest), reported an IP24 of 1,945 barrels of oil equivalent (79% oil) from a mid-length (~7,600 foot) lateral producing from the Sycamore formation, at a depth of approximately 9,500 feet. First sales for the Leon well were reported on October 29, 2019, with the rate-time plot below highlighting the wells performance to date.

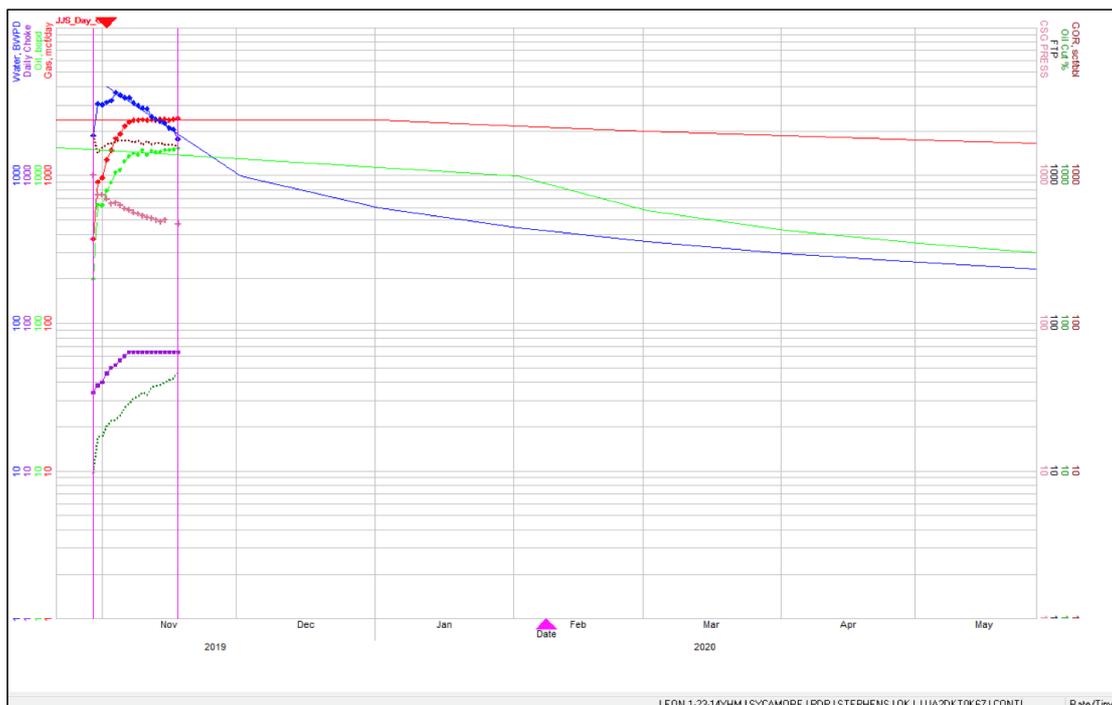

Figure 2. Rate-Time Plot Leon 1-23-14XHM well

These initial results are very encouraging, and the Company is looking forward to seeing the well's performance over the coming months. This data will add to the results we have seen from the Ringer Ranch well, which is tracking above our own pre-drill estimates for a typical horizontal Sycamore well in the SWISH AOI.

Importantly, the Company's first operated well to be drilled in the SWISH AOI (the Jewell 1-13-12SXH well) will also target the Sycamore formation.

This is the third Sycamore well to come on-line in the SWISH AOI since the middle of 2019 as the area continues to attract the attention of the tier-one operators that are enjoying significant success in southern SCOOP.

Background

Brookside Energy is a Perth-based ASX listed company that generates shareholder value by developing oil and gas plays in the world-class Anadarko Basin.

The Anadarko Basin is a proven Tier One oil and gas development province with significant existing oil and gas gathering and transportation infrastructure, a competitive and highly experienced oil and gas service sector, and a favourable regulatory environment.

Brookside is executing a "Real Estate Development" approach to acquiring prospective acreage in the Anadarko Basin and adding value to it by consolidating leases and proving up oil and gas reserves. The Company then has the option of selling the revalued acreage or maintaining a producing interest.

This model is commonly used by private equity investors in the sector, and has been successfully piloted by Brookside in the northern Anadarko Basin's STACK Play.

Brookside's US partner and manager of operations, Black Mesa Energy, LLC, is an experienced mid-continent operator, which identifies opportunities and executes development under a commercial agreement with Brookside. The business model effectively assigns risk and provides commercial incentives to maximise value for both parties.

The Company is now set to scale-up its activities and asset base significantly with its operated-interests in the SWISH AOI.

ABOUT BROOKSIDE ENERGY LIMITED

Brookside is an Australian publicly held company listed on the Australian Securities Exchange (ASX: BRK). The Company was established in 2004 and first listed via an Initial Public Offering in October 2005. The Company has established deep and valued relationships in the oil and gas sector over the last 10 years through its successful activities in the oil and gas sector focused on the mid-continent region of the United States. Brookside's goal is to build value per share through a disciplined portfolio approach to the acquisition and development of producing oil and gas assets and the leasing and development of acreage opportunities.

ABOUT BLACK MESA ENERGY, LLC

Black Mesa Energy, LLC is a Tulsa-based oil & gas exploration and production company focused on profitable development of petroleum properties located in the Mid-Continent oil province of the United States. Our lean and highly specialised technical and operations team is committed to providing attractive returns for our investors and shareholders by generating and drilling high quality oil and gas prospects. The founders of Black Mesa have worked together for over 30 years at companies they previously founded, including Medallion Petroleum, InterCoast Energy and Brighton Energy. Over the course of their careers, the Black Mesa team has drilled hundreds of horizontal wells and thousands of vertical wells in numerous mid-continent oil and gas basins. In addition to the financial backing from the Black Mesa shareholders, Black Mesa partners with outside investors on larger-scale projects by offering non-operated direct working interest participation.

GLOSSARY

APO WI	After pay out working interest
AFIT	After Federal Income Tax
AOI	Area of Interest
BFIT	Before Federal Income Tax
BOE	Barrels of Oil Equivalent
COPAS	Council of Petroleum Accountants Societies
Development Unit or DSU	Development Unit or Drilling Spacing Unit is the geographical area in which an initial oil and/or gas well is drilled and produced from the geological formation listed in a spacing order. The spacing unit communitises all interest owners for the purpose of sharing in production from oil and/or gas wells in the unit. A spacing order establishes the size of the unit; names the formations included in the unit; divides the ownership of the unit for the formations into the "royalty interest" and the "working interest"; Only one well can be drilled and completed in each common source of supply. Additional wells may be drilled in a Development Unit, but only after an Increased Density Order is issued by the Oklahoma Corporation Commission.
IP	Initial Production; the rate of initial flow from a well. Initial production rates are reported as 24-hour, 30-day, 60-day, and 90-day initial production rate periods.
Mboe	1,000 barrels of oil equivalent
Mcf	1,000 cubic feet
MMboe	1,000,000 barrel of oil equivalent
NPV₁₀	The net present value of future net revenue, before income taxes and using a discount rate of 10%.
NRI	Net Revenue Interest
PDP	Proved Developed Producing Reserves
Pooling Agreements	The pooling agreements facilitate the development of oil and gas wells and drilling units. These binding pooling agreements are between the Company and the operators as specified in Appendix 1.
PUD	Proved Undeveloped Reserves
Reserve Categories	These reserve categories are totalled up by the measures 1P, 2P, and 3P, which are inclusive of all reserves types: <ul style="list-style-type: none"> • "1P reserves" = proven reserves (both proved developed reserves + proved undeveloped reserves). • "2P reserves" = 1P (proven reserves) + probable reserves, hence "proved AND probable." • "3P reserves" = the sum of 2P (proven reserves + probable reserves) + possible reserves, all 3Ps "proven AND probable AND possible."
STACK	Sooner Trend Anadarko Basin Canadian and Kingfisher Counties – oil and gas play in the Anadarko Basin Oklahoma
SCOOP	South Central Oklahoma Oil Province - oil and gas play in the Anadarko Basin Oklahoma
SWISH AOI	Description of Brookside's Area of Interest in the SCOOP Play
Working Interest	Percentage of ownership in a lease granting its owner the right to explore, drill and produce oil and gas from a tract of property. Working interest owners are obligated to pay a corresponding percentage of the cost of leasing, drilling, producing and operating a well or unit
